RMS

RMS IBE
Internet Booking Engine

Make Booking Easier.
Run your property more efficiently and give travelers what they want by adding online booking to your website.
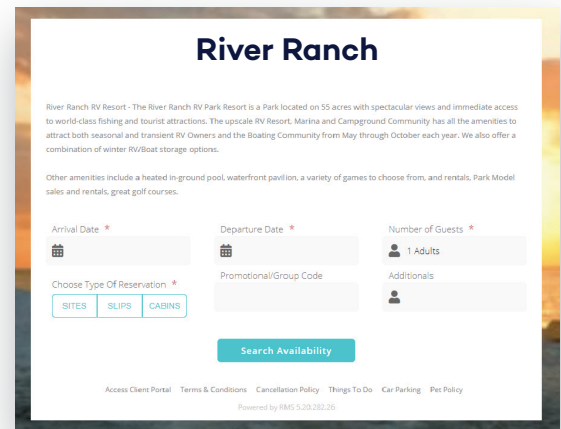

RMS IBE | Internet Booking Engine

Don't miss out on bookings.

Add a **Book Now button** to your website to provide your guests with an online booking option. With the RMS IBE, guests can view availability directly from a calendar or an interactive map. Enhance the traveler experience and maximize revenue potential by offering upsells and extras for your guests while they complete their reservation.

Simplify the guest experience.

Accept **direct bookings** from any device in real-time. The IBE integrates into all RMS distribution and property management features, keeping everything in sync.

Generate more revenue.

Get your share of the **$432 billion global online travel market*** by taking reservations online. Encourage your guests to book directly from your site by adding Best Available Rate (BAR) packages, seasonal discounts, and upsell options before checking out.

83%
of US adults now prefer to book their travel online*

Create a contactless booking process.

Take advantage of the IBE and **free up staff time**. When guests book online, they can self serve while you stay in control - allowing your staff to focus on current guests and operations.

About RMS

RMS has been innovating hospitality software for over 35 years, including a decade providing cloud-based reservation management systems. We support 6K+ properties globally, including RV parks, campgrounds, and more.
